### Introduction

These tests test the majority of the program's functionality, covering file IO (both ways), and manipulating races and runner lists.

In order to run the program from Eclipse, open the Project. Click the icon that is a green circle with a white 'play' button inside of it (triangle facing the right). If Eclipse prompts you which file to run, select WolfResultsGUI. The program should then execute, opening a GUI window somewhere on the screen. These tests have been designed to be executed chronologically, going in order without closing the program in between.

Test ID	Description	Expected Results	Actual Results
Test 1:	<b>Preconditions:</b>		
Test 2:			
Test 3:			
Test 4:			
Test 5:			
Test 6:
